RE: West Vermont Drinking Water Site, Speedway, Indiana Site ID#B5UJ
General Notice of Potential Liability

Dear Sir or Madam:

The United States Environmental Protection Agency (EPA) has documented and investigated releases or threat of release of hazardous substances, pollutants, or contaminants at the West Vermont Drinking Water Site, Speedway, Indiana located in Speedway, Indiana ("West Vermont Drinking Water Site" or "the Site"). The Site is a residential neighborhood in the West Vermont Street and Cossell Road area, comprised of multiple residential parcels.

Since June 2009, the Marion County Public Health Department (MCPHD) has documented vinyl chloride in water samples collected from residential drinking water wells at a maximum concentration of 62.7 micrograms per liter (ug/L), which exceeds EPA's Removal Action Level (RAL) of 2 ug/L.

EPA has reviewed the effects of these hazardous substances, pollutants, or contaminants on the public health, welfare or the environment and concluded that a response action addressing conditions at the Site is necessary to protect the public health, welfare or the environment. EPA has/will expend public funds to take this action pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. § 9601 *et seq* (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986, Pub. L. No. 99-499, 100 Stat. 1613 (1986) (SARA), unless EPA determines that such action will be done properly by a responsible party or parties.

Responsible parties under CERCLA include the current and former owners and operators of facilities, persons who generated the hazardous substances, and persons who were involved in the transport, treatment, or disposal of hazardous substances at the Site. Under Section 107(a) of

CERCLA, where EPA expends public funds in responding to and cleaning up hazardous substances, responsible parties are liable for all costs associated with the response action and all other necessary costs incurred in cleaning up the Site, including investigation, planning, and enforcement-related costs.

EPA is currently planning or has performed the following response actions to mitigate threats posed by the presence of hazardous substances at the Site:

1. Develop and implement a Health and Safety Plan;
2. Prepare a detailed work plan to accomplish the project in the most effective, efficient and safe manner;
3. Connect residential properties in the West Vermont Street and Cossell Road area to a municipal drinking water supply.
4. Transport and dispose off-site any hazardous substances, pollutants and contaminants at a CERCLA-approved disposal facility in accordance with EPA's Off-Site Rule (40 CFR § 300.440); and,
5. Take any other response actions to address any release or threatened release of a hazardous substance, pollutant or contaminant that the EPA OSC determines may pose an imminent and substantial endangerment to the public health or the environment.

EPA has received information that your client may have owned or operated a facility near the West Vermont Street and Cossell Road area (the Site) that generated or transported hazardous substances that were disposed of at that facility. By this letter, EPA notifies you of your client's potential liability with regard to this matter and encourages your client, as a potentially responsible party, to agree to reimburse EPA for costs incurred to date and to voluntarily perform or finance the response activities which EPA has determined or will determine are required at the facility. EPA is willing to discuss with your client the entry of an appropriate administrative consent order under which your client would perform or finance response activities and reimburse EPA for its costs. If a consent order cannot be promptly concluded, EPA may issue a unilateral order under Section 106 of CERCLA, requiring your client to perform specified work. Under Sections 106 and 107 of CERCLA, your client may be liable for reimbursement of EPA's costs, for statutory penalties, and for treble damages for noncompliance with such an order. If your client is a qualified small business, enclosed is an EPA Small Business Regulatory Enforcement Fairness Act (SBREA) information sheet which may be helpful if you are subject to an EPA enforcement action.

Because of the conditions described above, EPA believes that response activities at the Site must be initiated as quickly as possible. Therefore, EPA does not intend to utilize the special notice procedures available under Section 122(e) of CERCLA.

As a potentially responsible party, your client should notify EPA in writing within fifteen (15)

days of receipt of this letter of your client's willingness to perform or finance the activities described above and to reimburse EPA for its costs. The response should be sent to:

Valerie Mullins, Enforcement Specialist
EPA – Region 5
Enforcement Services Section 1
(Mail Code: SE-5J)
77 West Jackson Boulevard
Chicago, IL 60604-3590

If EPA does not receive a timely response, EPA will assume that your client does not wish to negotiate a resolution of their potential responsibility in connection with the Site and that your client declined any involvement in performing the response activities.

Your client's response should indicate an appropriate name, address, and telephone number for further contact. If your client is already involved in discussions with State or local authorities or involved in a lawsuit regarding this facility, your client may continue such activities as they see fit. This letter is not intended to advise your client or direct you to counsel your client to restrict or discontinue any such activities already underway. You are advised; however, to report the status of those discussions or actions that you have with State and local authorities in your response to this letter and to provide a copy of the response to any other parties involved in those discussions or actions.

If you need further information regarding this letter, you may contact Mr. Thomas C. Nash of the EPA, Office of Regional Counsel at 312-886-0552 or Ms. Valerie Mullins of the Enforcement Services Section at 312-353-0324. For technical questions, you may contact EPA On-Scene Coordinator Shelly Lam at (317) 417-0980.

Due to the nature of the problem at this facility and the attendant legal ramifications, EPA strongly encourages your client to submit a written response within the time frame specified here. We hope your client will give this matter immediate attention.

Sincerely,

Linda M. Nachowicz, Chief
Emergency Response Branch
